Signalling on London Underground since the early 1960's

Presented by
Colin White

Tuesday 15 July 2025

Venue: An online webinar

Commencing at 5:30pm BST

Talk synopsis

Colin will describe signalling changes on the Underground over his career. It will remind us of the purpose and include a brief overview of all aspects of signalling including mechanical locking, automation and Control Rooms. It will start with signalling in the sixties and end with a personal view of the future.
